Summary

Passionate and driven 19-year-old full-stack web developer based in Eindhoven, Netherlands. My programming journey began at the age of 13, and over the years, I have cultivated extensive experience in building web applications with React, PHP, and Node.js. Currently pursuing advanced software engineering studies at Fontys University, I bring a deep understanding of programming concepts, functional programming, and API development. Originally from Sofia, Bulgaria, I graduated with top marks from one of the country's leading software universities, having mastered topics ranging from DevOps to in-depth JavaScript, React, and backend technologies. Fluent in English (C1 level), I am also learning French and committed to continuous learning and professional growth.

Experience

Web Developer
Outsourcing Company – Remote
2024 – Present

- Building dynamic web applications using PHP and React, delivering robust and scalable solutions for diverse clients.
- Collaborating with remote teams, leveraging tools like Slack, Notion, and ClickUp to ensure smooth communication and project tracking.

Lead React Developer (Intern to Junior Developer)
Neterra – Sofia, Bulgaria
May 2024 – August 2024

- Advanced from intern to junior developer, leading React-based projects for this IT solutions company.
- Developed two major web applications, creating scalable and maintainable front-end architectures.
- Provided ongoing support for legacy projects after leaving the company, solving critical bugs and improving functionality.

Frontend Developer
Outsourcing Company – Remote
2019 – 2022

- Started professional career at 16, contributing to the development of web application front-ends.
- Delivered high-quality, responsive UI components using HTML, CSS, and React.

- Worked in a fast-paced environment, meeting deadlines and exceeding client expectations.

Education

Bachelor's Degree in Software Engineering
Fontys University – Eindhoven, Netherlands
2024 – Present

- Learning advanced software engineering concepts, including programming layering, functional programming, API development, and C#.
- Building on prior knowledge to explore more complex and advanced levels of software engineering.

Diploma in Software Development
Software University (SoftUni) – Sofia, Bulgaria
2021 – 2024

- Graduated with full marks from Bulgaria's top software university.
- Followed a comprehensive curriculum, including DevOps, React, backend development with Node.js and MongoDB, JavaScript in depth, and more.
- Progressed from beginner to software engineering professional, gaining hands-on experience through lectures, practical assignments, and exams.

Skills

Technical Proficiencies:

- **Frontend:** HTML, CSS, React, NextJs, TypeScript, PHP
- **Backend:** Node.js, Firebase, MongoDB
- **Programming Concepts:** Functional programming, OOP with C#, API design
- **Other Tools:** Slack, Notion, ClickUp

Additional Skills:

- UX/UI design principles for web applications
- Strong communication, problem-solving, and teamwork

Languages

- **English:** C1 (Fluent)
- **French:** Beginner (Currently Learning)
